I really like it

As a teacher, participant and collaborator with the Erasmus+, I have to admit that the program allowed me to get to know other teachers from Poland and Italy and expand my knowledge of their culture, language, and customs. Sharing with them all was a unique opportunity. Also, the activities I was asked to do as part of my participation in the program were also valuable to me as they required my keeping an updated blog of the different events, trips, workshops, etc, using different apps to create and upload students' contributions, and they all helped me learn, improve, and even lose fear when using technology. Overall, I look forward to having the opportunity to participate in another Erasmus project as it is a means to stimulate my personal and professional growth. All of it was positive, enriching and rewarding!

Additionally, I must say that my students' involvement and participation in the activities were great. They were very enthusiastic and always eager to get together with their partners to share, enjoy, learn and play. Families were also a fabulous support with all the activities.

100% fulfilling!
