i would love to complete another project which was unaffected by the pandemic. However the UK cannot be involved unfortunately.

Thank you all for the great experience, brilliant people from different countries, who have become reliable partners and good friends. Thank you all for new ideas, teaching methods and development, which will definitely show its results in the future. Big thanks to Alessandra, her family and her team for this amazing opportunity to be involved in such a project!

The experience was unique for students and teachers. It was a pity that the restrictions caused by COVID-19 pandemic limited the in person communication and collaboration among the partners.
